

CivE 505 Introduction

Hello Professor Kim! My name is Benjamin Klassen. I am the class rep for the 4A CivE class.

I am a big fan of gardening and baking. I'm hoping to bake all of my own bread this term for the first time. I'm also hoping to save money by growing vegetables (\$3 head of lettuce vs. \$2 pack of seeds... slight savings)

I have worked at the MTO, a tower company, a helical pile company, and ARUP as a PM and bridge engineering intern. I aspire to become a bridge engineer. This course fastinates me in lieu of that goal knowing that dynamic analysis is often required on bridges.

I also hope to do a Master's with Professor Walbridge after I graduate.
